RESEARCH AND TRAINING

Research

The Centre has a regular activity of research that supports on a scientific basis the activities of rehabilitation aiming for the best quality services for patients. We share our improvements through the participation in conventions, training courses and scientific publications.

Training

- The Centre: - Accredited provider for ECM courses;
- Projects and creates courses and training programs for professionals, teachers and parents;
- Accredited internship location for: Università di Roma "La Sapienza", Università degli Studi di Roma "Tor Vergata" and Università di Roma LUMSA.

THE CENTRE

We are an high specialised centre for the rehabilitation of age of development disorders. Our aim is to guarantee the efficiency of the treatments along with the right reception of each patient.

We are the only specialised centre in Italy, approved by the healthcare national service, that provides treatments for stammering and for the rehabilitation of language and learning disorders.

Mission

The functional rehabilitation and recovery activities aim for:

- Maximum recovery from the identified disorders;
- The best quality of life and the psychosocial integration - or re-integration - for our patients

OUR SERVICES

The Centre is one excellence from our region for disorders such as:

- Stuttering
- Specific language disorder
- Specific learning disorder
- Autism spectrum disorder
- Cognitive disability
- Psychomotor disability
- Motor control disease
- Attention deficit disorder/hyperactivity (ADHD)
- Attention disorder
- Otolaryngology (deafness, diverted swallowing, dysphonia, tubaric insufficiencies, velopharyngeal insufficiencies, cleft palate) .
